

ArcGIS 10 Education Edition - 1 Year Licensed Software

The Education Edition of ArcGIS version 10 requires an authorization number that must be activated before use. An authorization number will be printed on the inside of the DVD sleeve, along with instructions for activating it. Visit www.esri.com/EducationEdition to activate the authorization number **before installing** the software. An ESRI Global Account is required. (If you do not already have an ESRI Global Account, you can create one at this website.)

FAQs for the software are available at <http://www.esri.com/software/arcgis/eval-help/index.html>

Please note that the some of the FAQs currently are designed for the general purpose evaluation license, and any reference to the length of the evaluation term should be disregarded. The term of the Education Edition is 365 days and the license level is ArcInfo.

- Insert the DVD and choose ArcGIS Desktop [Setup](#)
- Wait for the installer to load (authenticate as administrator if necessary), accept the license agreement, choose a Complete install, and install to the default location.
- After the install completes, click Finish and choose ArcInfo (Single Use). Click **Authorize Now** and choose “I have installed my software and need to authorize it”, “Authorize with ESRI using the Internet”, enter contact information, and enter your authorization number. Choose “I do not want to authorize any extensions” (and don’t evaluate any extensions either - they are included with your license).

You should download and install the latest service packs periodically, available from [http://www.esri.com/Support/ Downloads: Patches and Service Packs](http://www.esri.com/Support/Downloads/Patches%20and%20Service%20Packs). As of March 2012, ArcGIS 10 SP 4 is current.
